SUMMARY

Healthcare technology professional with 8+ years of experience spanning software engineering, statistics, healthcare data, analytics, management consulting, and cross-functional program execution. Experienced in building data products and developer tools, translating complex technical and analytical problems into practical solutions, and working across engineering, product, client, and business teams. Combines a technical foundation in software development and data science with experience leading projects, managing stakeholders, and delivering technology in complex healthcare environments.

WORK EXPERIENCE

Truveta – Health data startup

Seattle, WA

Software Engineer

November 2021 – Present

- Design and build software and data products that enable researchers and healthcare organizations to more effectively work with large-scale clinical data.
- Independently designed and implemented Python and R SDKs with 30+ APIs, supporting workflows including data acquisition and cleaning, clinical data analysis, complex imaging data, and external data integration.
- Apply statistical analysis and data science methods to healthcare research, including regression, Bayesian statistics, Poisson models, and other analytical approaches.
- Partner closely with research and customer-facing teams to investigate data and product issues, develop reproducible solutions, and improve analytical workflows and user experience.
- Led cross-functional development of a major platform feature, serving as both technical lead and de facto product manager by defining requirements, coordinating development, and working directly with customers.
- Improved software development and deployment processes by transitioning manual deployments toward continuous deployment and establishing more rigorous testing and smoke-test practices.
- Create analytical templates and workflows tailored to customer needs and technical constraints, and communicate complex technical concepts and analyses to audiences with varying levels of technical expertise.

IBM

Cambridge, MA

Senior Data Scientist | Managing Consultant

October 2018 – November 2021

- Led development of data science and technology solutions for healthcare, government, medical device, and pharmaceutical organizations, combining clinical data, analytics, software engineering, and consulting.
- Led an agile team of 10 data scientists and architects developing an end-to-end platform to automate prior authorization using electronic medical record data and natural language processing.
- Worked directly with client executives and subject-matter experts to identify needs, develop value propositions, communicate technical solutions, and translate business requirements into technical roadmaps.
- Managed development of a healthcare solution that reduced clinical workload by 50%, reduced operational costs by 20%, and achieved greater than 90% accuracy in its rules engine.
- Developed a clinical evidence platform for medical device regulation that accelerated evidence-gathering workflows while achieving 91% accuracy against clinical data; led model training and coordinated knowledge transfer between technical teams and client experts.
- Developed a demand forecasting platform for a multinational pharmaceutical company, applying data science to complex commercial and healthcare datasets.
- Expanded the scalability of a clinical data solution by leading development of a web-scraping capability to incorporate external medical policy information.
- Managed projects across the full lifecycle, from problem definition and client engagement through technical development, implementation, and delivery, then helped commercialize and implement the resulting solutions with additional clients.

SKILLS

Software Engineering: Python, R, SQL, Spark, APIs, SDK Development, Pipelines, CI/CD, Distributed Computing

Product Management: GitHub, Jira, Azure DevOps, Microsoft Office, ADO, Project Management, Technical Documentation

Data & Analytics: Data Science, Statistical Analysis, Machine Learning, Data Modeling and Visualization, Reporting

Product & Leadership: Product Development, Program Management, Requirements Gathering, Implementation, Roadmap Development, Cross-Functional Leadership, Process Improvement, Strategy, Stakeholder Management

Consulting & Stakeholder Management: Client Engagement, Strategic Problem Solving, Executive Communication, Workshop Facilitation, Team Leadership, Technical Translation

Languages: English (Native), Spanish (Fluent), Modern Greek (Elementary)

VOLUNTEER EXPERIENCE

King County Search and Rescue - King County Search Dogs - missions to find missing persons and evidence.

Team Fox Boston - events planning and fundraising for local chapter of Michael J Fox Foundation.

PAWS - events planning, foster care, animal care, dog exercise, and animal socialization for animal shelter.

EDUCATION AND PUBLICATIONS

University of North Carolina at Chapel Hill –

Chapel Hill, NC

B.S. Statistics & Analytics, B.A. Economics, minor Hispanic Studies

May 2018

Honors: Carolina Research Scholar, Buckley Public Service Scholar, Heritage Greece Scholar
