SUMMARY

Healthcare professional with 8+ years of experience leading cross-functional initiatives, building stakeholder relationships, managing complex programs, and using data to improve outcomes. Experienced working with healthcare organizations, technical and non-technical stakeholders, and multidisciplinary teams to translate organizational goals into actionable plans and deliver results. Strong communicator and relationship builder with experience leading teams, managing competing priorities, and working independently. Brings a combination of healthcare expertise, program leadership, analytical problem solving, and a strong commitment to mission-driven work supporting individuals and families affected by neurodegenerative disease.

CORE COMPETENCIES

Program & Project Management • Community & Stakeholder Engagement • Relationship Building • Cross-Functional Leadership • Team Leadership & Mentoring • Partner Management • Strategic Planning • Data-Informed Decision Making • Program Evaluation • Goal & KPI Management • Process Improvement • Executive Communication • Presentation & Storytelling • Documentation • Microsoft Office • Google Suite • SQL • Python • R • Spanish (Fluent) • Greek (Elementary)

WORK EXPERIENCE

Truveta – Health data startup

Seattle, WA

Software Engineer

November 2021 – Present

Program Leadership, Stakeholder Engagement & Healthcare Technology

- Served as the de facto project manager for the engineering team for multiple years, coordinating team priorities, workstreams, timelines, dependencies, and deliverables in the absence of a dedicated project manager.
- Used Jira to organize work, monitor progress, identify blockers, and keep multiple initiatives moving toward shared goals.
- Coordinated with product, engineering, and customers to align stakeholders on priorities, resolve issues, and deliver initiatives.
- Partnered directly with Customer Success on technically complex customers, participating in customer conversations to understand needs, build trust, resolve challenges, and ensure successful adoption.
- Served as a trusted technical partner to customers and internal stakeholders, translating complex healthcare technology and data concepts into clear, actionable guidance.
- Led development and ongoing support of Python and R SDKs used by researchers and analysts across 30+ APIs, coordinating requirements, development, testing, documentation, and deployment.
- Worked with large datasets using SQL and Spark to analyze data, identify issues, and spearhead data-driven decision making.
- Created technical documentation, workflow examples, and enablement materials to improve adoption and repeatability.
- Identified opportunities to improve processes by establishing structured approaches to plan, prioritize, track, and deliver.
- Regularly balanced competing priorities across customers, internal stakeholders, and engineering initiatives while maintaining focus on organizational and customer outcomes.

IBM

Cambridge, MA

Senior Data Scientist | Managing Consultant

October 2018 – November 2021

Healthcare Consulting, Client Leadership & Program Delivery

- Served as a trusted consulting partner to payer, pharmaceutical, and healthcare clients, leading multiple concurrent projects focused on improving healthcare operations and clinical workflows.
- Led a 10-person team, coordinating work across multidisciplinary consultants and client stakeholders while mentoring team members and supporting professional development.
- Managed client engagements from requirements gathering and solution design through delivery, coordinating timelines, priorities, deliverables, and stakeholder expectations.
- Built strong client relationships through proactive communication, expectation management, and structured follow-through.
- Partnered with healthcare organizations to understand current-state workflows, identify barriers and opportunities, and develop practical solutions to improve processes and outcomes.
- Delivered multiple projects focused on prior authorization, helping healthcare organizations improve workflows involving clinical information, authorization requirements, data exchange, and decision-making.
- Used data science and analytics to identify workflow bottlenecks, analyze complex datasets, and support scalable solutions.
- Regularly presented findings and recommendations to executive and client audiences, translating complex technical and analytical concepts into clear actions and decisions.
- Managed concurrent client engagements, resolving issues, communicating progress, and ensuring alignment with stakeholders.
- Maintained detailed project documentation and communications to support accountability, alignment, and execution.
- Collaborated across multidisciplinary teams to solve problems, manage changing priorities, and deliver high-quality outcomes in complex client environments.

VOLUNTEER EXPERIENCE

King County Search and Rescue - King County Search Dogs - deployments to find missing persons.

Team Fox Boston - events planning and fundraising for local chapter of Michael J Fox Foundation.

PAWS - events planning, foster care, and animal care, exercise, and socialization for animal shelter.
